Student Number: 214652275

Last Name: Elbogdady

First Name: Mohamed

Course: EECS 3421

Section: N

Instructor: Professor Jarek Gryz

Additional Comments

I believe the specified requirements were simple enough to be able to capture in a simple E/R Diagram; however, although not explicitly stated, every studio should have at least one series, every series should have at least one episode, and every series should have at least one character. The problem with this is, it is not possible to represent an “at least one” relationship in our E/R diagram design.
